T80350 Cam Bearing Positioner-GEVO

T81120 Cam Bearing Remover - GEVO

T81390 Cam Segment Alignment Pin for GEVO Engines

T85010

Camshaft Section Lifter for GEVO Engines

This lifter aids in the installation, timing and removal of Evolution cam sections. The mounting surface has nylon pads to protect the cams, and has velcro straps to retain the section during transportation.

T85020

Idler Gear Lifter for GEVO Engines

The T85020 attaches and lifts the Evolution idler gear. The lifting jaw can be rotated 360 degrees to accommodate left and right cam sections and lock into proper position by using the locking pin. The jaw is opened and closed by turning a flange nut.

T85231

Cam Bolt Adapter (14MM 12 Pt. , X Shank) for GEVO Engines

This 14 MM 12 point adapter is used to torque the Cam Bolts on Evolution Engines. It is used with the T16492TECH Adjustable Torque Wrench.

T85461

Cam Brg Install & Removal Tool*

T85461K

Cam Bearing Installation and Removal Kit for GEVO Engines

The T85461K set pictured below is used to install and remove the large and small Evolution Cam Shaft Bearings.

The larger middle bearings are removed/installed using the T85601 Large Bearing Removal and Installation Tool (#2), and the T85461 Tool (#1) is used to install/remove the smaller end bearings. The T85461 incorporates a double acting ram, and the T85601 is equipped with a single acting ram, but both are powered with the T85601B Double Acting Hydraulic Pump (#3).
